MusicPlay3000 Free

Audio/Video player, like Winamp. It supports codecs such as MP3, MPEG, WMA, WAV, FLAC, AAC, OGG, AIFF, AU, AC3, DTS, DTS-HD, APE, etc. With codecs you can play.mp3/.m3u files and.mp4/.m4a/M4A/.avi/MP4/3GP/3GZ/3GPP/MP4P/ASF/FLV/H264/AVCHD etc. It is able to play internet radio streams using the Spotify/Pandora/Radio-Tuner APIs. It also supports third-party DSP plugins such as AcidRip (Support for skins, text overlays (like Winamp, Foobar2000), and external control of media playback (e.g. Spotify Connect) An integrated auto-aspect ratio converter (is supported. Video may be scaled using SPUCK (currently in testing) The skin and textoverlay currently supported are the original colorschemes of Winamp 2.0. Features: * Portable (single EXE). * Multi-threaded (for multi-core systems). * VBR audio. * DSP plugins: AcidRip (Spectrum (Microsoft PowerMedia Player (Power3D Media Player (Visualization (Playlist (* Playlists and Audio/Video searches. * Playlists can be shared with other computers. * Supports OPML and simple RSS files. * Playlists can be synced to iTunes/Windows Media Player

What's New In MusicPlay3000?

***** File: The application is written in C++ with the inspiration of foobar2000's functionality in mind and also some feature ideas from Winamp (video, etc) current look will look like something like mediaplayerclassic with media buttons on the toolbar. ***** Requirements: ----- #. X86-Windows is supported. #. If you have Windows XP x64 (32bit), you can use a trick to make it work, by changing the 'native' architecture to 32bit. This can be done by right-clicking on the exe file in the file manager and changing the 'Architecture' to 32bit. That trick isn't necessary for Windows 2000, Windows 98 and Windows ME (Windows NT). #. Visual studio 6 is recommended, but in theory, any C/C++ compiler should work (Visual studio 2003 is supported too). #. The following static libraries (some optional): #. libcurl, libcurl.lib (opt) #. libbz2, libbz2.lib (opt) #. libjpeg, libjpeg.lib (opt) #. libpng, libpng.lib (opt) #. libjpeg-turbo, libjpeg-turbo.lib (opt) #. The following dynamic libraries (in windows explorer) or.so (other platforms): #. libasound #. libexpat #. libxml2 #. libcurl #. The following dynamic libraries (in windows explorer) or.dll (other platforms): #. zlib #. The following shared libraries (in windows explorer) or.dll (other platforms): #. boost #. flac #. 'CreateProcess' How to install: ----- #. Extract the zip file (directly the folder) to some directory #. In the extracted folder there should be 2 files: 'Install' and 'README' #. Go to the 'Install' folder #. Run the setup file from the command prompt (win 98/ME) #. Follow the steps in the ReadMe.txt file (no in that case) Preferred configuration: ----- #. For maximum compatibility, you should have at least the following: #. Windows XP with SP1 #. Visual Studio 6 #. libcurl 7.9.2 (optional) #. libexpat 2.0.1

System Requirements For MusicPlay3000:

Minimum: OS: Microsoft Windows 7, 8.1, 10 (64-bit only) Memory: 4 GB Processor: Intel i5 1.8 GHz or better (Core i3 2.4 GHz or better) Graphics: 256 MB VRAM (512 MB VRAM for Windows 10) Storage: 7 GB available space DirectX: Version 9.0c Network: Broadband Internet connection Resolution: 1024x768 Additional Notes: 1. A Steam Client will be
